

cassino online que paga na hora

Going through the math, a 1,000 megawatt rated coal generator with a 75 percent capacity factor generates about 6.6 billion kWh in a year, equivalent to the amount of power consumed by about 900,000 homes in the Northeast but only 460,000 homes in the South.

What is a Megawatt.

One gigawatt (GW) = 1,000 megawatts = 1 billion watts.
