The mathematics of Playtech games works so that the

RTP of different slots is always the same. If a player selects a specific game a

nd will play it constantly or change the game, the percentage of returns will al

ways be similar. Thus, it excludes the possibility of finding a "winning lo

ophole."

To create the illusion of victory, mathematics can work in several ways

. Thus, at one time, the system has a low percentage of return, after which it i

s increased or vice versa. In this way, Playtech does not give players the abili

ty to predict when to play and when not.

Through this algorithm, you, as the casino owner, will receive from 18%

to 27% of the total income from deposits, and your players will be satisfied wi

th the gain. As a result, you get profits and happy customers at once!

You only need to create a comfortable atmosphere in the club to keep th

e client in for a long time. Due to the advanced mathematics of Playtech's softw

are, many players quickly get into the game. The system can start handing out pr

izes to lure new players and gain trust, after which it can generate profits to

casinos. This method is the most efficient as it both keeps players engaged and

helps operators to increase their revenue.

Operators are always worried whether there is a possibility of bugs in

the game or fraud on the client's side. Playtech takes care of safety and cr

creates unique algorithms, which provides unpredictable outcomes. By utilising Pla

ytech Gaming System, you can prevent any fraudulent activities.
