<p&gt;&lt;/p&gt;&lt;p&gt;The TL;DR version of this review is: surprising ligh
t, extremely pocketable, does the job, not my dream charger but at 👏 th
e price it s well worth it.</p&gt;
<p&gt;We ve covered a product of Lepow s before, the Moonstone. Like the Moon
stone, the Poki comes 👏 with a cloth carrying case that you can stash a
USB cable in (it appears to come with a 6 ‡ 👏 USB-> MicroUSB,) or ch
uck your ID and credit card in and use it as a wallet while you re out. It s &#1
28079; actually the first thing that stood out when I was looking at the device
. The Moonstone is still going strong 👏 with a friend of mine a year la
ter.</p&gt;
<p&gt;The battery delivers a 90% conversion efficiency rating according to sp
ecs on the 👏 manufacturer s website. Most batteries go from the high 70
  s to mid 80 s. You want to see a higher number as 👏 this is how much p
ower gets delivered with the rest being lost in conversion.</p&gt;
<p&gt;The Poki can charge and recharge at &#128079; 2.1amps. This means you
re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you
should 👏 be able to charge this in under five hours and with 90% conve
rsion efficiency you should have around 9000mAh of 👏 actual juice to sp
are. That should be enough for at least three complete charges from dead to full
for any 👏 smartphone on the market today.</p&gt;
<p&gt;2.1 amp charging also means you re not going to spend ~7 hours charging
a 3000mA phone 👏 from dead, more like an hour and a half if your phone
supports it.charging that fast.</p&gt;
