Anxiety changes brain chemistr

y, and makes it easier for the mind to focus on the negative. You're

not only more likely to have a scary thought when you have anxiety

you're also more likely to focus on the thought, have the thought cause

more anxiety, and ultimately have more scary thoughts in the future.

We have a brain that processes information very deeply and feels emotions ve

ry vividly, compared to other people. This trait is linked with

many good qualities empathy, creativity, and giftedness among them, bu

t it also means we experience unsettling scenes very differently than other peop

le.
