court in New Delhi that Vivo had siphoned off \$12 billion by hiding their profits for several months. The agency also said that many people affiliated with Vivo concealed their employment while they manufactured smartphones, smartphone accessories, and online services. The company was founded in 2009 and is headquartered in

There are 9 squares involved with the 7, so $480 \times 9 = 471$ other squares. These other squares contain the 92 other mines. So the number of grids with a 7 at a particular spot is $8(47192)$. That is out of a total of $\binom{480}{99}$ different grids.

Probability of getting a 7 in Minesweeper - Math Stack Exchange

math.stackexchange.com/questions/111111/probability-of-getting-a-7-in-minesweeper

We have $492556 = 125244$ ways for an easy grid to have an 8 somewhere. Out of the 1.88 trillion total easy grids, this gives a probability of about 6.1×10^{-8} . So, very rare indeed!

probability - How rare is it to get an 8 in minesweeper?
