The sum of odd numbers formula is $S = \frac{n}{2} [a + l]$ where a is the first odd number, l is the last odd number and n is the number of odd numbers present in that range. Another formula to calculate the sum of first n odd numbers is $S = n^2$.

The sum of odd numbers formula is $S = \frac{n}{2} [a + l]$ where a is the first odd number, l is the last odd number and n is the number of odd numbers present in that range. Another formula to calculate the sum of first n odd numbers is $S = n^2$.
