There are 9 squares involved with the 7, so 480

9=471 other squares. These other squares contain the 92 other mines. So the n

umber of grids with a 7 at a particular spot is 8(47192). That is out of a total

of (480 choose 99) different grids.

Probability of getting a 7 in Minesweeper - Math Stack Exchange

math.stackexchange : questions : probability-of-getting-a-7-in-min
