API Call in JavaScript Using the fetch() Tj T\* BT /F1 1

used to fetch resources from a server. All modern browsers support the fetch met  
hod. It is much easy and simple to use as compared to XMLHttpRequest.

Making API Calls

The first step in making an API call is knowing the Uniform Resource Loca  
tor (URL) for the application or server that the API will access.

This is the destination of the request issued when making an API call. The second

step is to choose which command to send with the request.
